

VACUUM PUMP IN CASE COMPONENTS AND LAYOUT

FLUID SAMPLING SET IN CASE (HKFES-PRPK)

Item	No.	Product name	Article number
1	1	Sampling hose for vacuum pump	HKVAKPS06-1-2000-K
2	1	Vacuum pump with adapter	HKVAK-PUMPE-MET
3	1	Adapter for 100 ml	-
4	1	Adapter for 250 ml	-
5	1	Hose cutter for sampling hose	KR-SCHNEIDER
6	1	Sample bottle, glass 250 ml with lid	HKPROBEF-GL250D
7	1	Sample bottle, glass 100 ml with lid	HKPROBEF-GL100D
8	-	Oil analyse set <i>(not included)</i>	OELANALYSE SET 3 can be obtained separately Scan the QR code and order on the website

HANSA-FLEX recommends Oil Analysis Set 3 for use with bio oil and mineral oil. With this analysis set, you receive an additional analysis to determine the absolute water content of the oil in accordance with the Karl-Fischer titration method (KFT). The amount of acid in the oil is determined using the AN/NN (acid number/neutralisation number). A density-temperature profile determination can be used to prove that mixing of different oils has taken place.

All the listed components of the fluid sampling set
can be found in our online shop www.shop.hansa-flex.de
